Subject: Re: thank you

Hi Rachel, I'm not aware of existing literature but it is certainly happening. I think we've had more than 10 patients who have had chest surgery under 18 (as young as 15) and 1 bottom surgery (17). I'm going to send you a separate email with a picture I took of Jo Olson's poster from SAHM (in case you hadn't seen) which shows decrease in chest dysphoria and similar rates of complication and no regret in the under 18 crowd compared to older. I know she has recently submitted it for publication but not yet in press.

We are trying to work with HUP and Drs Rumer, McGinn to start to try to get some pre-post data for top surgeries for youth under 18. I can also have one of my RAs do a lit search to make sure not missing anything and would be interested if you find anything since a lot of our youth are being denied coverage for top surgery if under 18. Best, Nadia

Linda, Nadia,

Good afternoon. I know that we had discussed at US PATH the possibility of gender confirmation surgery for young people under 18 years of age. This could include top surgery for trans young men and top and bottom surgery for trans young women.

Is there any literature to support this protocol? Please let me know if you have any references.

Thanks so much and take care, Rachel

I wanted to follow-up to provide my contact info and say thank you so much for the wonderful visit today! I included more details on our research, clinical activities and community outreach for our Adolescent HIV and Gender Clinic Programs in the packets I gave you. Please let me know if there is any other information or assistance I can provide moving forward.

We'll be in touch after the new year about scheduling/agenda for your CHOP visit in February.

Especially in this time, Pennsylvanians are so lucky to have you at the helm of state government. Wishing you a peaceful and joyous holiday and new year!

Best, Nadia
